LUMBER COMPANY

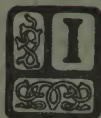

WHOLESALE
LUMBER
LATH
SHINGLES
AND
MILL WORK

OFFICE, YARDS, DOCK AND WAREHOUSES
100 ELSTON AVENUE
CHICAGO

Six Long Distance Telephones, All Monroe 2076

*To Carpenters
Contractors
and Consumers
of Building Material*

IN sending you this catalogue we desire to be of assistance to you in selecting any building material you may need. We are prepared to ship promptly lumber and mill work for dwellings, barns, corn cribs, elevators, factories, schools, churches, and other private and public buildings.

An immense stock of dry lumber and mill work is always carried at our Chicago plant awaiting your orders for quick shipment.

It will be to your advantage to send us your inquiries, as our prices are as low as they can possibly be made for reliable material. We are prepared to make you promptly an itemized price free on board cars at any station you desire.

We have no agreements with Retail Dealers' Associations, and belong to no Manufacturers' Trust. We are therefore prepared to make wholesale quotations to everybody—including you.

If you have never bought of us, and do not feel quite safe in placing your order with us, go to your own banker and ask him about our responsibility or you can consult any Commercial Agency in the United States or Canada. **Besides you do not have to pay us one cent until 10 days after you get the goods.**

It is our determined and unalterable policy to have our customers not only satisfied, but so well pleased with every item of the whole shipment that they are enthusiastic in recommending us to their friends.

When in Chicago we trust you will come and see us. You can reach us in 10 or 15 minutes from the Down Town Depots. Let us meet you and get acquainted, and we will gladly show you the large and varied stock of lumber and mill work on hand. Even if you are not prepared to buy we want you to become one of the large circle of friends that we have. We rely on our friends and customers for our best recommendations.

DIRECTIONS FOR ORDERING MILL-WORK

Save valuable time by closely following the directions below.

Doors, Blinds and Sash are often ordered $1\frac{1}{4}$, $1\frac{1}{2}$ and 2 inches thick. Do not use these terms, as it only delays orders. The regular thicknesses are $1\frac{1}{8}$, $1\frac{3}{8}$ and $1\frac{3}{4}$ inches, and all other thicknesses must be made to order at extra price.

Unless otherwise specified, or covered by standing instructions to the contrary, we will understand all orders as calling for **regular western styles of goods**, as described in this Catalogue.

The universal rule in ordering mill-work is to give the width first and then the height.

WINDOWS AND SASH

- A**—The term Sash indicates a single piece.
- B**—The term Window means two pieces, an upper and a lower Sash, made with either plain or check rail.
- C**—In ordering regular Sizes of Sash or Windows, give size of glass and number of lights and thickness; if a Window, whether check or plain rail; state whether open or glazed, and if glazed, whether with single or double strength glass.
- D**—In ordering odd sizes, give size of opening to be filled and describe as above.
- E**—When measurements are given in inches, it usually indicates the glass size, and we will so understand it; when given in feet and inches the outside measure or opening is understood.

BLINDS

In Ordering, Specify Whether Outside (O. S.) or Inside (I. S.) Blinds are Wanted

- F**—**Outside Blinds.** In ordering Outside Blinds, if regular, give size of glass and number of lights in Window for which they are intended and size of opening to be filled. If odd, give thickness and state if rolling slats (R. S.), stationary slats (S. S.) or half rolling and half stationary slats ($\frac{1}{2}$ R. S., $\frac{1}{2}$ S. S.) are required. If other than these styles are required, order must so state.
- G**—The regular opening for Outside Blinds is one (1) inch longer than Check Rail Windows of corresponding glass size. Where Blinds of extra length for brick buildings are desired, order must so state and Blinds will then be made two (2) inches longer than sash opening.
- H**—Our standard Blinds are $1\frac{1}{4}$ inch thick, full rolling slats made for regular openings, as above described. When not otherwise specified, we assume this to be the style desired, and fill orders accordingly.

DOORS

- I**—In ordering always give width, height, thickness, number of panels and quality. If full instructions are not given, to save time in shipment, we assume that our Standard Door $1\frac{1}{2}$ inch, Four Panel O. G. "A" quality is desired, and will fill order accordingly.
- K**—If other than Four Panel O. G. Doors are required, for Panel Doors give number and arrangement of panels and style of Sticking; for Sash Doors give number of style desired; indicate whether open or glazed, and if glazed, style of glazing.
- L**—Where Moulded Doors are required state whether flush or raised mould is desired, and if to be moulded on one or two sides.

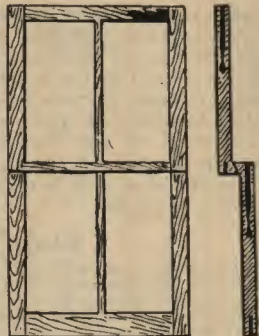

FRAMES

- M**—In ordering, state whether for Outside or Inside Frames.
- N**—For Window Frames give size, thickness and full description of window, stating whether for frame, brick or brick veneer building. If for frame or brick veneer building, give width of studding. If for brick building, give thickness of wall. State if frames are desired with or without pulleys.
- O**—For Outside Door Frames give size and thickness of door and state whether frames are required with stops or with rabbeted jambs, and if sill is to be pine or oak. If for frame building, give width of studding; if for brick building give thickness of wall.
- P**—For Inside Door Frames give size and thickness of door and width and thickness of jambs; state whether stops or rabbeted jambs are required.

WINDOW FRAMES

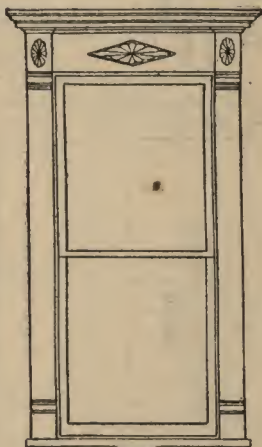

2580

2581

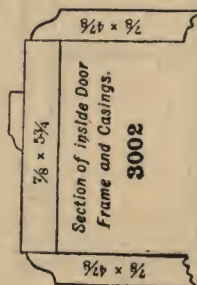

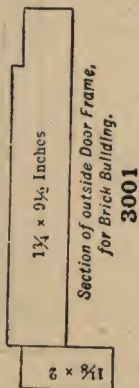

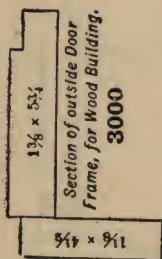

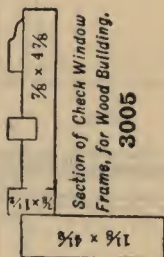

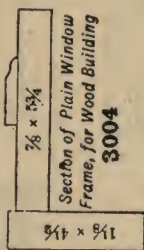

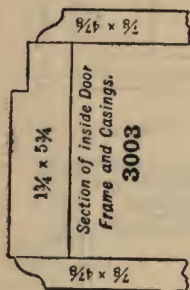

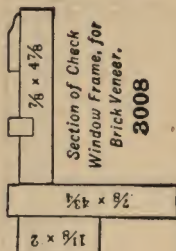

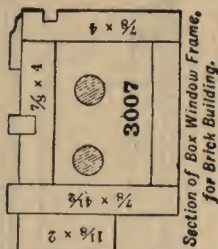

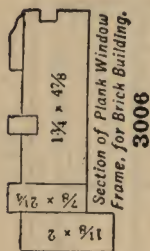

2585

2586

We manufacture any style of Door or Window Frames, Jambs, etc. Let us make your frames. Can ship either nailed or knocked-down, but prefer to sell knocked-down as it is much easier when bundled to ship, less danger of being broken, also takes up much less room in the car, and a saving in freight. Each frame packed in one bundle, cut and fitted exact, only need nailing together. We make good frames.

SECTIONS OF DOOR AND WINDOW FRAMES

We carry all kinds of Frame Material in stock, and can furnish the different parts in any lengths required to make up frames. Include us in your next order.

STORE FRONTS

3500

Can furnish any design you may want.

It will pay you to get our prices.

OUR POLICY

It is our determined and unalterable policy to have our customers not only satisfied, but so well pleased with every item of the whole shipment, that they are enthusiastic in recommending us to their friends.

OUR SPECIALTY

Is to furnish the Consumer with Building Material as he wants it, when he wants it and at the price his dealer pays for the same class of goods.

Useful Information

One thousand shingles, laid four inches to the weather, will cover 100 square feet of surface, and five pounds of shingle nails will fasten them on.

One thousand lath will cover seventy yards of surface, and eleven pounds of lath nails will nail them on.

Eight bushels of good lime, sixteen bushels of sand and one bushel of hair will make enough good mortar to plaster 100 square yards.

One cord of stone, three bushels of lime and a cubic yard of sand will lay 100 cubic feet of wall.

Number of Nails Required in Carpenter Work

To case and hang one door, one pound.

To case and hang one window, three-quarters of a pound.

Base, per 100 linear feet, one pound.

To put on rafters, joists, etc., three pounds to the 1,000 feet.

To put up studding, three pounds to the 1,000 feet.

To lay a 6-inch pine floor, fifteen pounds to 1,000 feet.

Remember...

YOU must Buy your Building Material from the manufacturer and wholesaler to secure wholesale grades at the same price your dealer pays. Why not write us for delivered prices and—
